About the *Make Decisions Real* project

Make Decisions Real is a 3-year ILC project that aims to help people with intellectual disability and their supporters through the development of tools and training that will:

- increase their knowledge and skills around decision making and decision supporting,
- improve their confidence to make and support decisions,
- increase opportunities for decision making and self-advocacy, and
- lead to greater choice, autonomy and independence.

The *Make Decisions Real* project has been made possible by a NDIS *Information, Linkages & Capacity Grant*.

About this Directory

One of the goals of the *Make Decisions Real* project was to evaluate existing supported decision making resources from around Australia.

We did this by asking people with intellectual disability and their supporters from our member organisations around Australia to look at a range of different existing resources and giving us their feedback.

The resources were evaluated for their content, clarity, relevance and accessibility.

This Resource Directory was made as a result of the resource evaluation and can be used as a helpful guide for people with intellectual disability and their supporters who want to learn more about supported decision making.

Thank you to all the organisations who allowed us to feature their resources in this Directory.
