

Risk Matrix

A risk matrix can help you weigh up the risks of a decision. Put an **X** in the box that matches best.

If the risk happens, how much will it affect me?

		Not at all	Only a tiny bit	Somewhat	A lot	Extreme
What are the chances of the risk happening?	Definitely					
	Probably					
	Maybe					
	Probably not					
	Impossible					

What is the decision about?

Notes: e.g. What can you do to reduce the risk?
